Tiny Pustules Spread Up to Elbows -Could Not Sleep and Scratched Until She Bled - After Seven Months of Futile Treatment, Little Girl was Completely

CURED IN TWO WEEKS BY CUTICURA REMEDIES

"My daughter, twelve years of age, was afflicted with a terrible itching of the hands which was so bad at night that she was unable to sleep. She scratched herself until she bled. The trouble began in the shape of small pustules about the size of a pinhead which produced severe itching and then a hard scab formed on top. These always opened up again, bleeding badly. From the fingers it extended over the hand and as far as the elbows. The doctor said it was eczema and that recovery would necessarily be slow. He treated my daughter for seven months, but the trouble always grew worse. Then I started in to use the Cuticura Remedies. After I had used Cuticura Soap for two weeks, with Cuticura Ointment and Cuticura Pills, her hands were healed. Mrs. M. Strecker, South Haven, Minn., April 1 and July 7, 1908."
